I am a friendly and hardworking university student looking for a first opportunity to work in the software engineering field. I have excellent programming skills in Java, developed through my university courses and through self-teaching. I work well in a team, as I am easy to get along with and enjoy collaborating on projects with other creative individuals. I am self-motivated, the better part of my computer science education having been self-taught. I am always wanting to learn more and always enthusiastic about my work.

I am excited about the possibility of working as an intern for Google. I use Google's products every day and would love to be a part of developing and working on these products so that they can continue to help other people on a daily basis.

EDUCATION

Wellington High School
2008 - 2013

NCEA Level 3 Achived With Merit
NCEA Level 2 Achived With Metit
